

# T•A•P™

## Hi-Output Installation System

The T•A•P™ High Output PCO insulation blower system is a tough, production machine for the heavy seasonal attic capper or an installer expanding into the new home market, including crawl space treatments. Able to blow up to 100 bags of T•A•P™ per hour in attics with its powerful 12.5 Amp direct drive double blower system, this machine maximizes your staff's valuable time assuring you of solid profit margins - job after job. Growth oriented PCO's will love this turnkey solution for entering new markets, and appreciate its ease of service, reliability, and superior production rate. The T•A•P™ High Output Installation System is a perfect complement to the powerful T•A•P™ vacuum machine, refilling an emptied attic with TAP in less than a day, in most cases. If utilized properly, it is not unusual for this system to pay for itself within a year.

### High Output PCO Package - (see summary list below)

Purchase the complete package below and you will receive two full days of sales and installation training.
