

T•A•P GV180 Vacuum System

More POWER & More PROFIT!

How often have you entered an attic filled with filthy, feces covered, nest-ridden old fiberglass insulation, realizing the owner had an enormous problem that you dreaded addressing? Here's the solution that has WCO's and PMP's talking! The T•A•P Vacuum System allows you to clear an attic of contaminated insulation in only a few hours, with no hand contact at all! Saving hours of back breaking labor per job, this system instantly ramps up profit margins and job opportunities.

Removing Contaminated Insulation

Spend more time selling products and services instead of time-consuming hand removal of insulation. Pest Control Insulation Systems is proud to offer this insulation removal equipment specially configured for WCO's and PMP's and featuring the powerful T•A•P GV180. Get the T•A•P Vacuum System and ask about our competitive lease/purchase options and other vacuum packages.

The T•A•P GV-180 Vacuum System includes everything you need: 175' hose, clamps, connectors, reducers, pick-up tube, five disposable bags, and the T•A•P GV180 vacuum. Tough, dependable gas-powered Briggs & Stratton 18 HP, electric start V-Twin motor drives this hard-coated steel vacuum. This fan devours all types of loose-fill insulation, wet or dry, as well as bird nests, rodent droppings, bat guano--and neatly bags it for you. This is no hobby-shop vacuum! Fast as well as powerful, it can bag over two tons an hour! Also available for those especially nasty jobs - a washable, reusable heavy filter bag cover. You simply slip it over the standard disposable reclaim bags. Be sure to ask for support literature including insurance tips when buying this package.

Reclaim Bag with Vacuum

After you've removed the soiled insulation, be sure to replace it with T•A•P Thermal Acoustical Pest Control Insulation. Your customers will love you for it!
