PEST CONTROL INSULATION

▲ Billy Turk (Tap Insulation) demonstrates the proper equipment for removal of existing blown-in insulation. He also demonstrates the use of proper venting equipment, before new insulation is added.

TAP Insulation is loaded into the blower unit by Tim TenBrink (CC Portland, OR) and David Carrow (CC Orlando, FL.)▶

◀ David Carrow (CC Orlando, FL) takes a turn in the attic.

Kevin Baker (CC Lansing) returns from his turn in the attic. (You can't see the sweat, but it was there!)▶

We wish to thank Billy Turk for his hard work in getting this demonstration arranged. We look forward to carrying this highly-profitable product in the future and urge you to consider using this add-on service.
